HOW IT WORKS

Through hyper-hydration, The Dry Eye Drink™ by Bruder® was developed by eye doctors and formulated to give patients relief from ocular inflammation, a known cause of dry eye.

1 packet of The Dry Eye Drink can provide 2-3 TIMES the hydration of water alone thanks to its proprietary mix of electrolytes and vitamins.

Calcium Lactate

Potassium Chloride

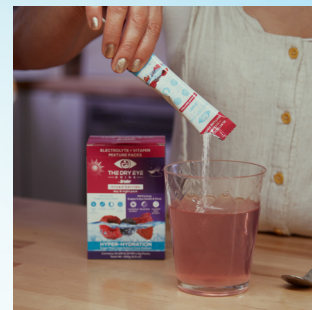

Malic Acid

Sodium Chloride

Citric Acid Anhydrous

ANTI-INFLAMMATORY INGREDIENTS

Green Tea Extract

Turmeric

Taurine

DHA (Algae)

Green Tea Extract. Studies show that Green Tea Extract improves ocular surface inflammation, Tear Break Up Time scores (TBUT), as well as meibum/oil levels in patients with evaporative dry eyes and Meibomian Gland Dysfunction.

Taurine. High levels of Taurine are present in the anterior part of the ocular surface. It is thought Taurine helps dry eye through its osmoregulatory action.

Turmeric. An Asian spice that has been shown to inhibit the pro-inflammatory cytokines that cause inflammation of the cornea and conjunctiva.

DHA (Algae). Omega-3s have been used in the care of dry eyes for years. Studies have shown that Docosahexaenoic acid (DHA) and its derivatives reduce dry eye related inflammation.

VITAMINS

A

C

B3

B6

B12

Vitamin A. Dry eyes are one of the first signs of Vitamin A deficiency. Studies have shown that Vitamin A supplementation improved the quality of the tear film and mucous membranes.

Vitamin C. Vital for repairing tissue and improving cellular function and immunity.

Vitamins B3, B6, B12. B Vitamins have been found to help nourish and repair the corneal nerve layer thereby alleviating burning and photophobia.

Add 1 Dry Eye Drink packet into 12-15 ounces of water

DIRECTIONS

Shake or Stir VIGOROUSLY until completely mixed

Drink 2 Dry Eye Drinks per day along with 8 glasses of water
